

Google Studios no code website

Prompt:

You are a Senior Fintech Product Designer, Growth Marketer, and Full-Stack No-Code Engineer.

Build a high-converting Fintech/Stock Market SaaS marketing website.

Website Name: AlphaSight

Product Type: AI-Powered Market Screener & Algorithmic Trading Platform

Primary Goal: Free trials & Premium Data Subscriptions

Target Audience: Active Retail Traders, Swing Traders, and Quantitative Analysts

Brand Style: Institutional, data-centric, trustworthy, high-performance (Dark Mode focused)

FRONTEND REQUIREMENTS

Include:

- Hero with dynamic data visualization, scrolling stock ticker, & CTA ("Start Analyzing Free")
- Live Market Data preview (simulated charts or heatmap)
- "How it Works" (e.g., Connect Broker -> Set Strategy -> Automate)
- Feature sections (Real-time alerts, Backtesting engine, AI sentiment analysis)
- Security & Compliance section (Encryption standards, Data partners like Nasdaq/Bloomberg)
- Pricing table (Free vs. Pro Data vs. Institutional API)
- Social proof (User returns, "As seen in [Financial Times/CNBC]", Trustpilot reviews)
- Comparison Table (Us vs. Bloomberg Terminal/Traditional Brokers)
- Footer with extensive legal disclaimers, sitemap, & socials

BACKEND & ADMIN DASHBOARD

Include:

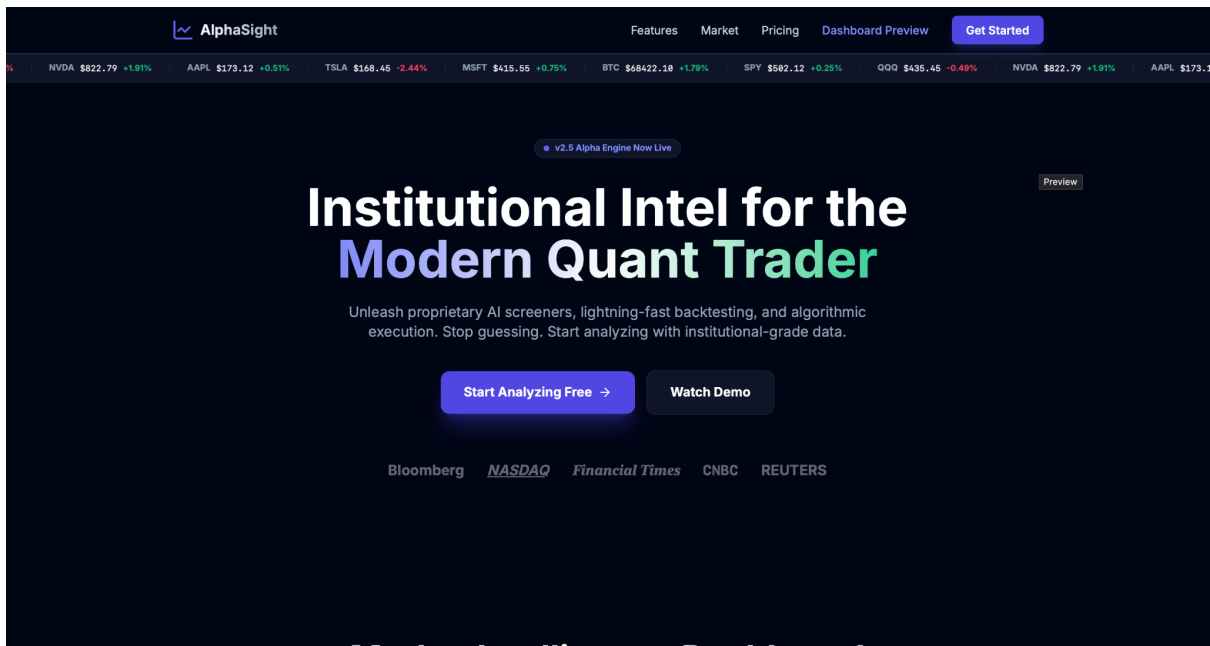

- Content management (market news, educational academy, changelogs)
- Subscription & Tier management (access control for real-time vs. delayed data)
- Lead capture forms (Newsletter for "Morning Market Brief")
- Affiliate/Referral program dashboard
- SEO tools for financial keywords
- Design customization
- CMS for:
 - Publishing daily market analysis and "Stock of the Week" reports
 - Managing webinar events and earnings calendar
- Complete control over:
 - Legal disclaimers and footer risk warnings (Global edit)
 - Pricing tables and data package add-ons
 - Theme toggling (Light/Dark mode defaults)
- Pre-filled placeholder pages for "Market News" and "Tutorials"

DESIGN & TECH

- High-contrast Data UI (optimized for readability of charts/numbers)
- Mobile-responsive (critical for traders on the go)
- Ultra-fast load times (conveying low latency)
- Conversion-optimized layout for high-ticket subscriptions

Generate the full SaaS website structure and admin dashboard. Fully editable and scalable.

Output:

AlphaSight - AI Market Intel

Device

AlphaSight

FeaturesMarketPricingDashboard PreviewGet Started

Real-time Alerts

Ultra-low latency price and technical indicators alerts delivered via Webhook, SMS, or Email.

Backtesting Engine

Test strategies against 20 years of tick-level data with sub-millisecond precision.

AI Sentiment Analysis

Proprietary NLP models scanning millions of news sources and social data points every second.

★★★★★

"AlphaSight changed how I trade. I used to spend hours scanning manually. Now, my AI signals alert me before the move happens. It's essentially like having a junior analyst team working for me 24/7."

JS James Sullivan
Professional Swing Trader
